

A3 Size Template

For Full Bleed (Printed right to the edge) A3 make sure to have...

-At least 3mm bleed all around (shown in Magenta), Making the total page size 426mm x 303mm. This will then be cut to 420mm x 297mm

-Your text within the 'Text Safe Area' shown here in white. This is best to be at least 8mm in from A4 edges (Shown in Cyan).

-Your file is at a minimum resolution of 300dpi

PLEASE NOTE: *If these conditions are not met we will proceed with printing by reducing your file 97% and printing with a white (possible slightly uneven) border.*

If the file resolution is lower than 300dpi it will be printed at your risk.

*If you are committed to Full Bleed and are having trouble setting it the file up correctly, we can help with file preparation for a small fee. Please email **orders@quickcheapprint.co.nz** for more info.*
